Grading scheme
In the Spanish university system, modules/courses are graded on a scale of 0 to 10 points with the following qualitative equivalence:
0-4.9: "suspenso"; 5-6.9: "aprobado"; 7-8.9: "notable"; 9-10: "sobresaliente". A special mention, "Matrícula de Honor" may be granted to up to 5% of the students in a group provided they have got a "sobresaliente". To pass a module/course it is necessary to get at least 5 points.
In cases of recognition of ECTS, professional experience, cultural or sports activities, or student representation no grading will be recorded but, where appropriate, the word "Apto".

INFORMATION ON THE FUNCTION OF THE QUALIFICATION

Access to further study

This qualification gives access to Doctoral studies, provided that the student had completed a minimum of 300 ECTS credits in the overall teachings of Bachelor and Master.

Stated objectives associated with the qualification and professional status (if applicable)

The main aim of this degree is to provide students with the necessary skills, tools and abilities required to perform the functions of Superior Technician in Labour Risk Prevention described in Article 37 of the Regulation on Occupational Risk Prevention Services (Royal Decree 39/1997). This Master trains future professionals with a comprehensive view of three key areas of the Occupational Risk Prevention: Safety at work, Industrial Hygiene and Applied Psychosociology and Ergonomics.

The main learning outcomes and competencies acquired are: 1. To be aware of and able to apply the current legislation in issues of labor risk prevention regarding Safety at Work, Industrial Hygiene, and Applied Psychosociology and Ergonomics. 2. To demonstrate the capacity to assess, identify and control the risk deriving from conditions of safety, industrial hygiene and workload. 3. To be able to apply the core safety, health and ergonomic principles to avoid the workplace hazards on the basis of the specific characteristics of the different activity sectors. 4. To be able to intervene in cases involving serious and imminent risks identifying properly the situation, proposing concrete actions to manage the risk and coordinating relevant activities of the actors involved.
