Grading scheme

In the Spanish university system, modules/courses are graded on a scale of 0 to 10 points with the following qualitative equivalence:

0-4.9: "suspense"; 5-6.9: "aprobado"; 7-8.9: "notable"; 9-10: "sobresaliente". A special mention, "Matrícula de Honor" may be granted to up to 5% of the students in a group provided they have got a "sobresaliente". To pass a module/course it is necessary to get at least 5 points.

In cases of recognition of ECTS, professional experience, cultural or sports activities, or student representation no grading will be recorded but, where appropriate, the word "Apto".

INFORMATION ON THE FUNCTION OF THE QUALIFICATION

Access to further study

This qualification gives access to Doctoral studies, provided that the student has completed a minimum of 300 ECTS in the overall teachings of Bachelor and Master.

Stated objectives associated with the qualification and professional status (if applicable)

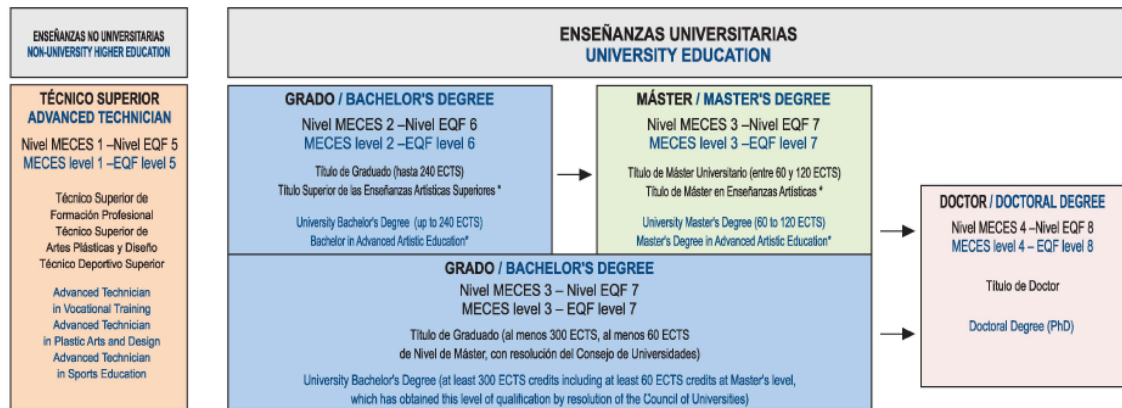

The main aim of this degree is develop critical thinking; prepare data for analysis and apply theoretical knowledge to practice through economic modeling; knowing the different analysis tools and their usefulness and applicability in each context; apply their knowledge and communicate their findings to specialists and non-specialists; learning to make decisions and propose appropriate solutions based on economic models studied; handle with ease the Innovation and Communication Technologies (ICT) applied to the area of Economics; acquire skills for the initiation and development of the doctoral thesis; keep an ethical commitment as a researcher in the performance of work.

The main goal of the Master is to provide advanced training, specialized and multidisciplinary, academic specialization and promote research activity. Advanced study in economics has great social and scientific importance. These studies provide the training of professionals with a great ability for abstraction, in order to identify and to model the essence of an economic problem. These professionals must have solid mathematical and statistical knowledge to the analysis of quantitative data and concise communication skills for the results of their investigations.
